

# THE CLEVELAND

## STELLAR SERIES

*Steel/Aluminum Pole with Two Piece Cast Aluminum Base*

The original Cleveland design was an integral part of the world's first "Great White Way" in 1915 on Superior Avenue in Cleveland, Ohio. King is proud to offer a taller variation of the original pole as part of its Stellar series of poles. Utilization of a 2-piece "clamshell" cast aluminum Cleveland base allows for a shaft height that ranges up to 30'.

It is available with the classic 16 flute tapered shaft as well as a tapered round shaft, in either aluminum or steel.

Whichever cross-section is selected, King offers complimentary post top or pendant luminaires. A wide selection of single, twin or multiple arm brackets, including finely detailed historical reproductions, contemporary, and themed styles are available.

### **Description**

The pole shall be of one-piece tapered aluminum or steel welded to a compatible base plate. It is available in either a round or 16 flute cross section. The decorative two-piece Cleveland base shall be cast aluminum, 30 3/4" in height, concealing the wiring hand hole, anchor bolts and base plate. Four stainless steel bolts, recessed for minimum visibility, hold the two-piece clamshell base together.

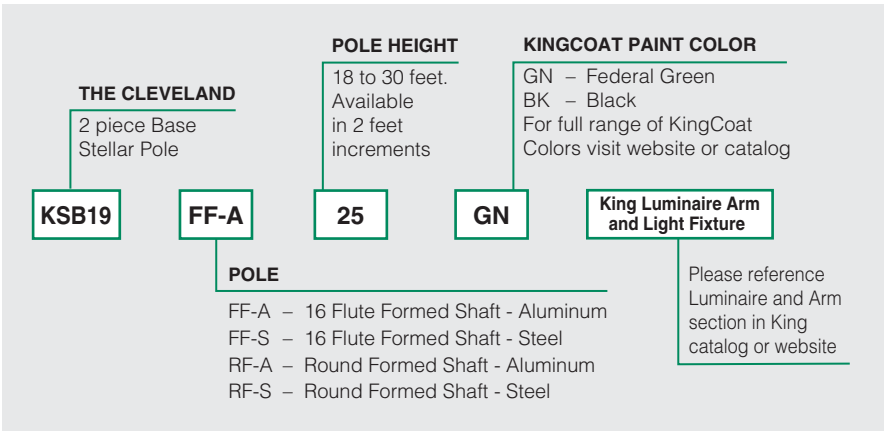

### **Finish**

The pole shaft and base cover shall have a powder coat finish, which utilizes our "KingCoat" paint system, offering a durable long lasting finish. For color selection, please see our King Coat color brochure in our catalog or website.
